

Rapid Response Emergency Cot

The **Rapid Response Emergency (RRE) Cot** is the solution to your surge capacity needs and provides immediate additional bed capacity for isolation, disaster preparedness, field hospitals, mass casualty incident, evacuation and shelters. Beds are sold individually or in a system of 8 beds with a heavy duty aluminum transport and storage cart with water proof cover.

The RRE Cot has been developed in conjunction with leading experts in the field of trauma and emergency medical care. The RRE Cot requires NO assembly or setup, saving precious time and man power needed in emergency situations. Unlike current cots that need repairs or replacement after only a few uses the RRE Cot will last for many years to come. Never have to worry about corrosion and drying time after decontamination is minimal. The RRE Cot is constructed of the highest quality polyvinyl chloride resin structural tubing which will not chip, dent, crack, peel, fade, stain or sustain bacterial growth. The patient support sling is a vinyl coated polyester mesh and is tension adjustable for maximum patient comfort.
